

METALPRINT type plate embossing machine

Images similar

Manual sign embossing machine in two sizes for versatile application in the workshop and industrial areas, ideal for the identification of small, quickly changing numeral and letter combinations.

The placement table is equipped with a clamping bar for the type plate and with placement markings. A 5- way adjustable table feed guarantees the precise spacing of the characters to one another and pressure limiting assures the universal depth of the embossing.

Choice of embossing wheels

The replaceable embossing wheels are available in typeface heights 2, 2.5, 3, 3.5, 4, 4.5 or 5 mm, they include all upper- case letter from A- Z, all numerals from 0 to 9 and the characters / , + -.

Special versions:

- Special machine designs for embossing keys, lock cylinders and bank cards
- Automated film transport for coloured embossing in non- metallic signs
- Placement table for semi- automatic movement in X and Y directions
- Work table for extra large signs
