

Pneumatic GIMA „S“ stamping gun

GIMA „S“ - quick-change head

GIMA „S1“ - wider head

GIMA „S2“ - head for engraved extensions

Description:

Light hand appliance with integrated stamping head (type holder) for safe, accurate and deep marking of metal parts

- Suitable et al. for steel, aluminium, brass etc.
- Due to new development of the type holder, it is possible to directly position this on to the workpiece
- Max. 6 characters/digits up to 6 mm or 4 digits up to 10 mm can be embossed
- Character size: up to 6 mm
- Font: figures, letters, special characters
- Maximum pressure: 8 bar
- 3 type holder designs:
 - S: rounded quick-change head for short texts or logos
 - S1: wider head for long texts
 - S2: head for engraved extensions
- Quick steel type change through pin locking
- Appliance is ideal for easy positioning on flat and round material
- Stamping gun has low recoil and noise levels

Steel types:

- Special steel types made from heavy-duty stamp steel
- Figures, letters, logos
- Sharp or dot-face dies
- Text, character height and width according to specification
