

Nameplate press

Description:

Every nameplate you mark says something about your products...and about your company. You will be proud of nameplates marked with GIMA Nameplate Presses. They are always easy to read with details accurately aligned...evenly spaced...and uniformly deep. Best of all, this kind of quality can actually cost far less than marking nameplates with tedious, troublesome, inaccurate, hand-stamping methods. So, consider the advantages of the versatile GIMA Nameplate Detail Press compared to your current marking system.

Easy-To-Use:

It's so simple, anyone can master the four-step operation in a few minutes.

- **Smooth Performance.** GIMA Nameplate Detail Presses can be operated comfortably in either a sitting or standing position.
- **High Production.** Customers report marking more than one hundred 16-character nameplates per hour. Distortion is virtually eliminated.
- **Flexible Operation.** Choose from two models depending on the size of the nameplates to be marked.
- **Character Spacing.** Each letter or figure character occupies a space as wide as it is high.
