

# GIMA-COLOR

## Description:

### **GIMA COLOR – the refillable metal marker.**

The economic solution for steelworks, the steel trade, shipyards, etc.

- Reduction of hazardous waste
- 100% paint usage – no waste
- Weather-resistant
- Font width: 3 mm

Our special paint does not dry up in the bottle

GIMA COLOR writes on all surfaces – metal, plastic, wood, cardboard, concrete etc.

GIMA COLOR writes on oily and rough surfaces

GIMA COLOR contains a non-toxic paint – no toluene, halogen (Cl) and no heavy metals

**Colour range:** red, blue, green, black, white and yellow

### **Product range:**

- Empty plastic bottle
- Replacement writing heads also available separately
- Paint in 1 litre bottles

## Operating instructions:

Fill canister with special GIMA refill paint. Hold canister upright and press down on surface to be labelled. In order to achieve uniform lettering, even pressure should be applied to the canister. Clean tip after use. Highly flammable. Keep GIMA COLOR away from naked flame.
