

# GIMA "P" STAMPING GUN, Power Solution in stamping

Images similar

## Characteristics

It's not only the design that distinguishes this product from all others, but also the functionality and the simple operation and maintenance. With the GIMA P you have a powerful hand- held embossing device with an embossing head for deep, clean and reliable embossing of metal parts (steel, cast iron, aluminium etc.)

- Light device with the PE type holder
- No power connection necessary!
- Energy: Ring with 10 propellant charges SPIT (standard or heavy- duty)
- With one stroke you can emboss up to 12 characters with 4 to 12 mm typeface height
- Typeset: Numerals, letters, special characters, company logos
- Steel types in various different designs with sharp or dotted (low stress) engraving
- Rapid change of types through pin locking
- The stamping gun is low- recoil
- 100% cartridge utilisation through the "Winchester cartridge system"
- The unit is suitable for simple positioning against flat and round materials
- The GIMA P is equipped with comprehensive vibration protection.
- Clean - thanks to good ventilation
- **[NEW]** Automatic piston retraction
- **[NEW]** Energy adjustment
- Weight with magazine: 3.3 kg

## Advantages:

- Lowest maintenance costs!
- Simple and robust system!
- Less recoil!
- More comfort!
- More power!

## Accessories:

- Cartridge ring with 10 propellant charges
