

Numberer stamping tool

Images similar

The manual stamping tool is the ideal solution for precise manual stamping of numerals and letters. You have a free selection of 2 to 10 characters, from 2 to 10 mm typeface height. The sturdy design with impact cap, base frame, hand protection and iron shaft guarantees reliable operation.

Designs:

- With impact cap
- Pin locking for simple manual adjustment
- Well proven in machinery construction, the steel trade, steelworks, shipyards
- Embossing tool equipped with visible engraving so that the embossed text selected can be easily read
- 4 sizes depending on typeface height
- 2 to 10 characters
- With 10 engraving characters (e.g. 0-9 and blank character) or with 13 engraving characters (e.g. 0-9 and +, -, /)
- With numerals and, if desired: Letters and special characters
- Typeface height: 2 mm to 12 mm
- Typeface per DIN 1451

Accessories:

Special typefaces on request: Reverse engraving, lower case letters, 2D engraving, dot- face characters, distinctive lettering. The manual embossing tools can be supplied with frames to centre the punch on round or flat parts, with hand protection or with iron shaft.
