

MANUAL STAMPING DEVICE PHSG 1, pneumatic

Images similar

Mark simply and with no force required - with the pneumatic manual stamping devices. The replaceable attachment piece allows stamping with both letters and numerals, special characters and company logos. This comprises 1 to 8 characters, depending on the variant and material. The typeface height, depending on model, is: 2 to 6 mm.

Small, compact and simple to use

This manual stamping device can be used to great effect with inspection stamps and markings.

The engraved attachment piece (letters, numerals, special characters or company logos) can be replaced and is mounted torque-proof.
